

## N46 room transmitter (also including two relays)

From August 2018 the **room transmitter N46 (F.01U.140.037)** and the **room transmitter N46 with two relays (F.01U.140.038)** will be delivered with a new connection socket for the pear push cable.

This means that the old connection sockets are only compatible with the previously delivered pear push cables (F.01U.140.030/F.01U.140.031). For the new N46 variants (N46-II and N46-2R-II), a new bulb switch with the corresponding connection is added to the product portfolio.

**The article number for the room transmitter is unchanged. The pear push cable has a new article number for the versions with 3m and 7m long cable.**

*We would also like to point out that the old model variant will possibly be sent during the transition period. If your order quantity exceeds our stock of the old variant, we will completely deliver the new variant to you. You can see which model variant you will receive on the delivery note and the invoice as well as the type label on the product.*

### Type plates on the device for differentiation

The new device variants are marked with "II" both on the packaging and on the device.

### Batteries for the N46

The batteries for the N46 also have a new article number.

**T.000.001.403 Lithium Batt. Energizer CR2450 duo pack**

**Please only use Energizer batteries, as the housings are adapted to these batteries. These have the best fit in the housing. This applies to both N46 variants I and II.**

**Compatibility overview is on the next page**

# N46 room transmitter (also including two relays)

## Compatibility Overview

Product name	Article number	Product illustration	N46-Room transmitter CRS-NC-N46 and N46-Room transmitter with two relays CRS-NC-N46-2R	N46-Room transmitter CRS-NC-N46-II and N46-Room transmitter with two relays CRS-NC-N46-2R-II
			F.01U.140.037/ F.01U.140.038
