TA70 Audio Extender
Remote loudspeaker and microphone

TeleAlarm®
swiss design

Carephones are not only installed in one-room apartments, but also in apartments with several rooms or larger houses. The TA70 was developed as an additional voice station with loudspeaker and microphone to ensure that communication between the resident and the alarm-receiving centre functions optimally, even at a greater distance from the Carephone itself. A good voice connection is essential in order to be able to provide targeted help in the event of an alarm or to rule out a false alarm.

The TA70 Audio Extender is designed for improved voice transmission to the alarm-receiving centre in conjunction with a Carephone. The TA70 can be installed in an adjacent room or on another floor than the Carephone. Voice transmission is in both directions, as the Audio Extender is equipped with both a microphone and a loudspeaker.

The TA70 Audio Extender is compatible with the entire TA74 family.
The dLAN® 550 duo+ powerline adapter from Devolo, which we have added to our range, is ideal for connecting the TA70 to your Carephone. The starter kit turns your power circuit into a network line, and the extension allows you to expand an existing dLAN.

Function Description

Voice connection in both directions
The TA70 Audio Extender is equipped with both a speaker and its own microphone. The volume setting of the connected TA74 is always used.

Connection
The TA70 works in combination with any TA74 family Carephone. One loudspeaker can be connected per device. A 3m LAN cable is included in the scope of delivery.
However, several Carephones, each with an Audio Extender, can be connected on the same local network.

Programming
The TA70 Audio Extender can be configured using the Maintenance button or the Configuration Manager software. To check if the TA70 is switched on, the grey button of the main unit can briefly be pressed to play a message/beep on the TA70 Audio Extender.

► Easy programming via an intuitive service menu

► Best in class audio quality

► Audio streaming over IP connection

► Vocal guidance

► Quick and easy installation

► Easy care - easy to clean and waterproof according to IP32

► 100% high-quality ABS material in premium white

► same size and design as the TA74 family

Technical Data

Dimensions (H x W x D)	50 x 191 x 191 mm
Weight	approx. 0.5 kg
Switched-mode power supply	Adapter 100 – 240 V AC / 0.18 A input, 6 V DC / 1 A output
Current consumption in standby mode	approx. 120 mA with power supply
Protection class	IP32 (IP30 wall mounting)
Connectivity	LAN/Ethernet connection (10/100 MB/s)

Please refer to the data sheet for further technical details.
