The New TA72 Carephone
from TeleAlarm

TeleAlarm®
swiss design

TeleAlarm Carephone TA72
Safety, Reassurance, Independence

Our Carephone products have been developed for people who lead an independent life in their own home but who want the feeling of security that help is always at hand when it is needed. The diversity of our customers means diversity of needs; that is why we design our Carephones to be as flexible as possible.

This way we can offer you products to suit your individual needs.

The TeleAlarm Carephone TA72 offers various innovations helping you to configure your device simply, efficiently and economically.

Communication via IP or analogue landline

Technological advantages

- **Unparalleled speech quality**
- **Simple programming:**
  Pre-programming via TeleAlarm Cloud Services or via the Configuration Manager
- **Compatible:**
  Can be used with the Tx-transmitters
- **Expandable:**
  Up to 10 Tx-transmitters are programmable
- **IP protection classes:**
  Dirt object and water protection in accordance with IP32 (TA72) and IP67 (Tx-transmitter)
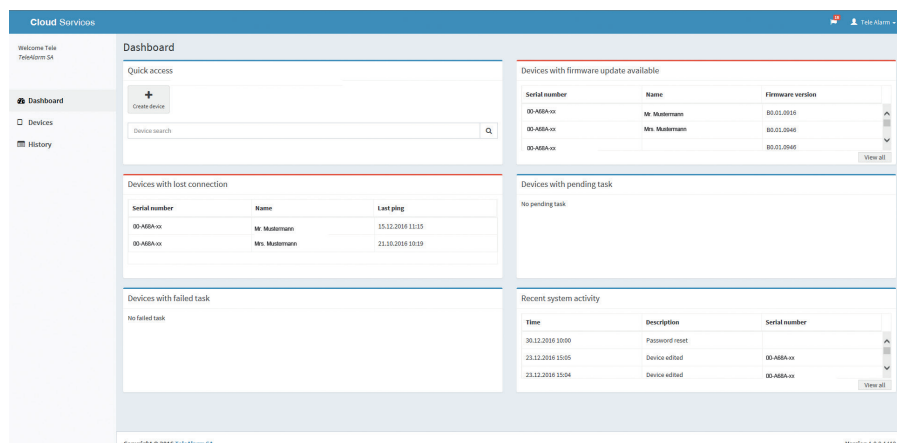

Our quality promise to you

- **Swiss Design – Made in Germany**
- **Simple operation**
- **Simple maintenance of the TA72:**
  Easy battery replacement for both the TA72 and the Tx transmitter
- **Management via TeleAlarm Cloud Services**

TeleAlarm Cloud Services
## Intuitive and convenient

Pre-programming via Cloud Services enables the simple installation of the TA72. On site, only the connection of the equipment, its activation by an installer and a test alarm call are necessary. Any later reprogramming and addition of further Tx-transmitters is carried out via Cloud Services.

Simple user interface
Access to Cloud Services via a web portal

Firmware updates
Now only on-site confirmation required

Automatic connection monitoring
Configurable test intervals

Information for every individual Carephone is displayed
Any necessary firmware updates, missing device connections and failed programming are clearly shown in the device overview, as well as in the device information

Free access, continuous development

TeleAlarm Control Centre Management System
Universal, flexible and secure

Our control centre management software (LMS) provides you with the best set-up
for the efficient processing of emergency and service calls in your centre.

- **Universal application**
  from small centres up to large centres linked with more than 20,000 connections.
- **Clear display**
  of all relevant information and functions
- **Flexible, individual management**
  of customer and device data
- **User-friendly analysis tool**
  for the technical status of equipment
- **Security**
  through automatic speech recording in the call history of all alarms and links
- **Safeguarding of availability**
  through various redundancy solutions
