TeleAlarm®

swiss design

New behavior concerns the following transmitters with order numbers:
- S35 Pendant Transmitter with reset possibility (RP)   F.01U.140.047
- S37 Wristband Transmitter RP   F.01U.140.052
- S37 Wristband Transmitter with red button and RP   F.01U.140.056
- S37L Wristband Transmitter with Locating function   F.01U.140.053

For all transmitters listed above:

- the LED is now yellow:

- new mode change:
  -> 3 x acknowledgements, then 1 x press button

- by default, no automatic alarm repetition

Additionally, for S37L Wristband Transmitter F.01U.140.053:

- it now offers an alarm button

- alarms can be triggered max. 5 seconds after acknowledgement

- transmitter programming is simplified
