The users, by their use of this product, agree to indemnify the manufacturer and/or seller of this product against all claims, litigation, and suits filed for patient information violations.

### **Intended use**

Use this product only for the purpose it was designed for; refer to the data sheet and user documentation for details. For the latest product information, contact Indigocare Europe or IndigoCare USA.

This hardware installation guide is a working and supporting tool for certified engineers for installing and maintaining iCall installations.

### **FCC compliance**

This equipment has been tested and found to comply with the limits for a Class B, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.

You are cautioned that any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## 1. General purpose

This document describes the implementation, programming and testing of the Welfare-Suicide Check interface in the Netrix software. The goal is to monitor a selection of rooms, and automatically warn the appropriate person if there hasn't been an action in a room for a selected amount of minutes.

## 2. Implementation

To enable the Welfare-Suicide Check interface, go to Input-Output screen via the menu "Setup→Input-Output" and activate the interface ( license ). Select Suicide check and input the amount of minutes after which an alarm should be triggered if there haven't been any actions for a selected room.

Group: The group number to be called when there hasn't been activity in a room after the "Suicide check Time".

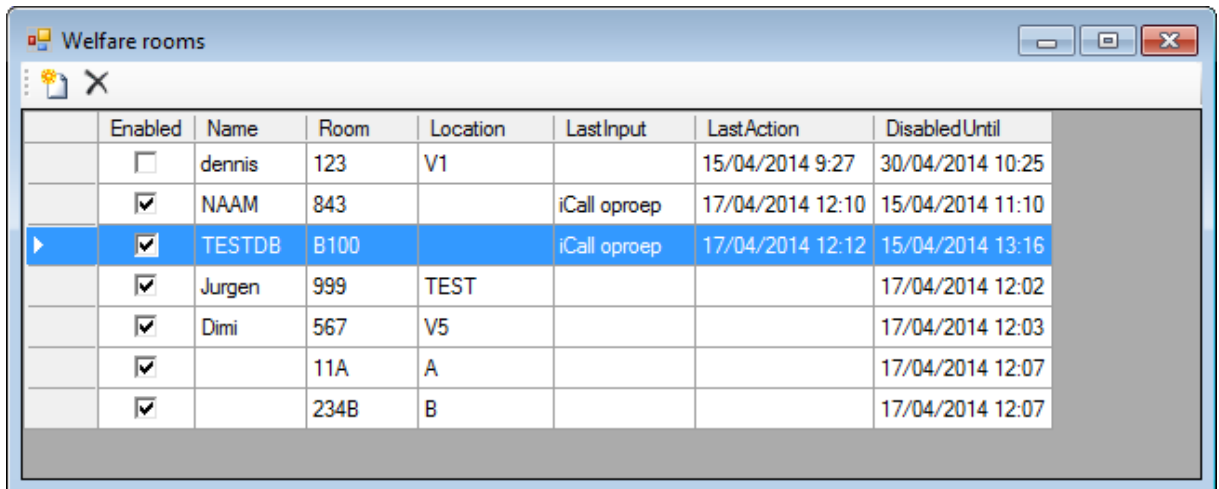

ScreenDebug: check this box if you need a debug screen for this interface

FileDebug: check this box to log the debug info

Errorlogging: Check this box to send errors to the errorlog.

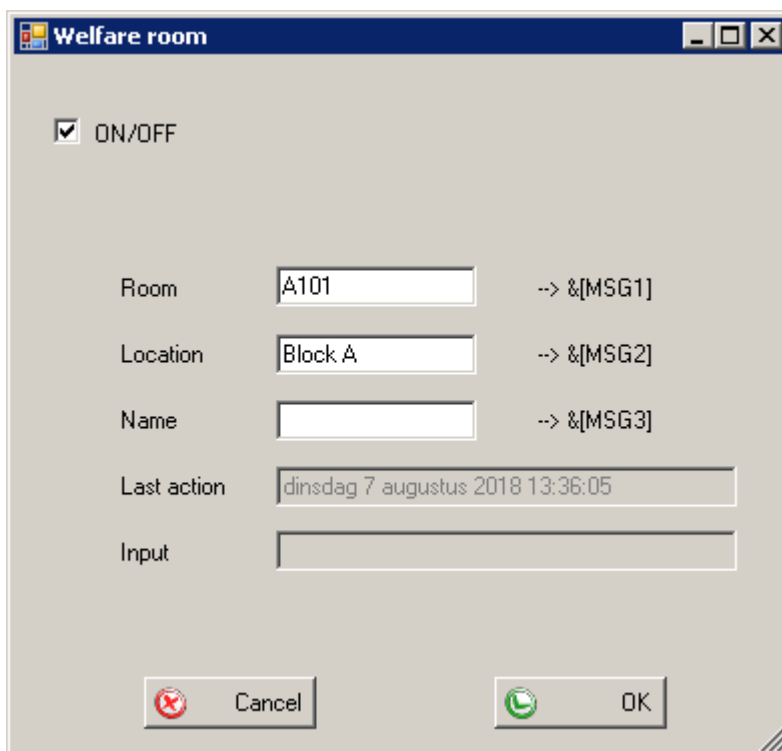

## Rooms

Click on the Rooms button to edit the appropriate rooms.

The screenshot shows a window titled 'Welfare rooms' with a table containing the following data:

	Enabled	Name	Room	Location	LastInput	LastAction	DisabledUntil
	<input type="checkbox"/>	dennis	123	V1		15/04/2014 9:27	30/04/2014 10:25
	<input checked="" type="checkbox"/>	NAAM	843		iCall oproep	17/04/2014 12:10	15/04/2014 11:10
▶	<input checked="" type="checkbox"/>	TESTDB	B100		iCall oproep	17/04/2014 12:12	15/04/2014 13:16
	<input checked="" type="checkbox"/>	Jurgen	999	TEST			17/04/2014 12:02
	<input checked="" type="checkbox"/>	Dimi	567	V5			17/04/2014 12:03
	<input checked="" type="checkbox"/>		11A	A			17/04/2014 12:07
	<input checked="" type="checkbox"/>		234B	B			17/04/2014 12:07

The screenshot shows a dialog box titled 'Welfare room' with the following fields and controls:

- ☒ ON/OFF
- Room:  --> &[MSG1]
- Location:  --> &[MSG2]
- Name:  --> &[MSG3]
- Last action:
- Input:
- Buttons: Cancel (with a red X icon) and OK (with a green checkmark icon).

If a room hasn't been checked for x minutes, a group call will be triggered and room details (Room number, location, name) will be sent to this group.

The current state is displayed in a window in the main screen.

The 'Welfare' window displays a table with the following data:

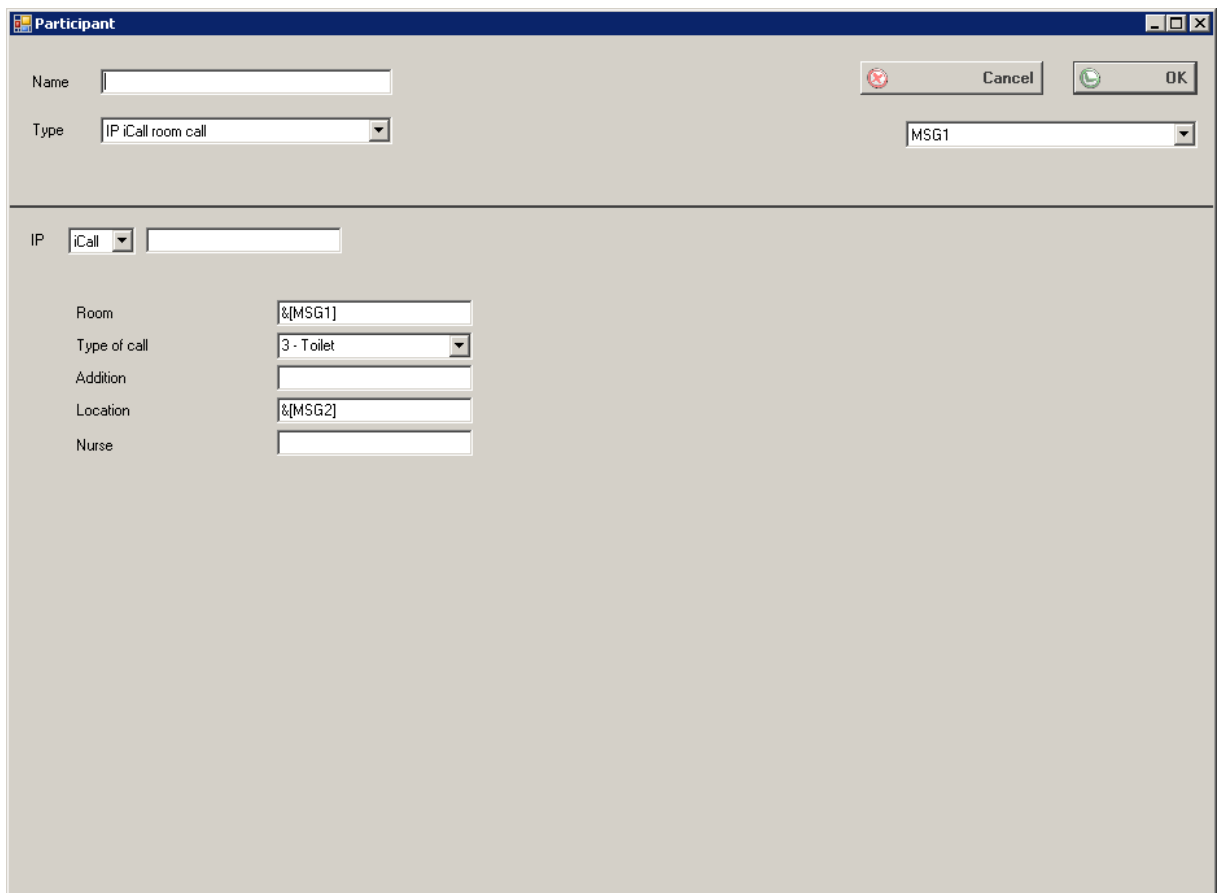

Enabled	Room	Location	Name	LastAction	LastInput
<input checked="" type="checkbox"/>	A101	Block A		7/09/2018 10:51...	iCall Netix
<input checked="" type="checkbox"/>	C102	Block C		7/09/2018 10:51...	iCall Netix
<input checked="" type="checkbox"/>	C105	Block C		7/09/2018 8:30/02	

Count=3

Red: Suicide check active (Message has been sent to group)

Green: Suicide check cancelled

With iCall, it is possible to set the appropriate room in a Suicide check state by broadcasting a Toilet status to this room. This action will change the room status, and hereby change the color in the Welfare screen as well (→ back to green).

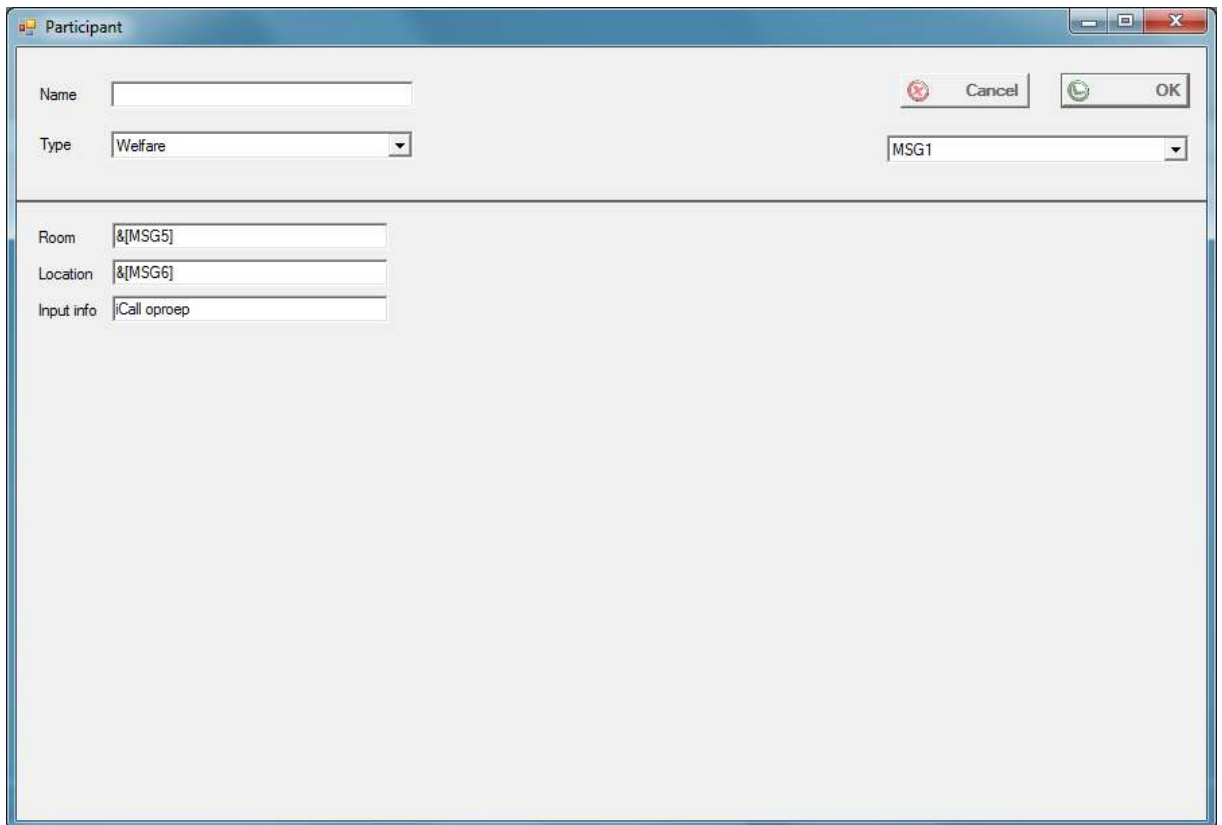

The 'Participant' dialog box contains the following fields and controls:

- Name:
- Type:
- MSG1:
- IP:
- Room:
- Type of call:
- Addition:
- Location:
- Nurse:
- Buttons: Cancel, OK

### 3. Programmation

To reset a room (register activity in a room), create or select a group and include a welfare message.

Select type “Welfare”.

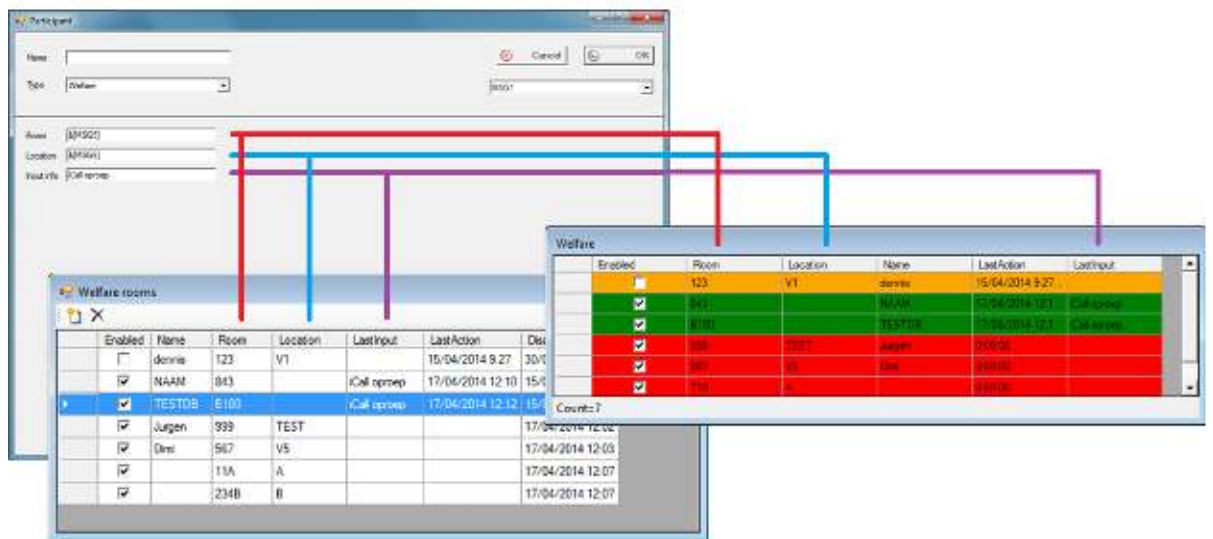

Room: the Room number

Location: The location of your room (can be left empty).

Room and location should match a room programmed in the Welfare setup (Input-Output)

Input info: additional info, for example to specify the source of the call.

## 4. Website integration

To manage the rooms, also a website is available.

Browse to the Netrix website <http://xxx.xxx.xxx.xxx/Netrix> where xxx.xxx.xxx.xxx stands for the IP address of the Netrix. Log in with the appropriate credentials. If you have a valid license, an additional link “Welfare” will appear in the menu.

You can now manage the rooms.
