1. General purpose

This document describes the implementation, programming and testing of the Access Control software. The goal is to send access control rights to the appropriate iCall IP units, to handle the access control in a correct manner.

2. <u>Login</u>

Before you can read or modify access rights, you have to login.

The default (installation) password is "icVeriPass". For other user access, you can give administration rights to any user, so they can login with their appropriate iButton/RFID.

For each project it's recommended to use the VeriPass on 1 dedicated PC, because not all settings can be retrieved from the access control units. Some settings are locally saved.

3. <u>Menu</u>

| IP | Scan the network for Access Control units |
|----------|---|
| द्व | Manage groups |
| Ê | Manage users |
| | Manage rooms |
| ~ | Manage access rights |
| | Upload all settings to the system |
| 1 | Settings screen |

Click on the respective icon to open its settings.

3.1. <u>Scan the network for access control units</u>

On startup, the application will automatically scan the network for access control

units. It will show differences with the latest scan in a listview.

| • | No difference |
|---|---------------|
| • | Not found |
| Ð | New |

Rescans can be made manually by pressing the rescan button.

| X | Cancel network scan |

|---------------------|--------------|---|---|--|--|--|----------|
| | Groups | | | | | | |
| | Q | 0 | 8 | | | | VeriPass |

This section shows all existing groups. A group is a collection of users that have the same access rights. Groups can be changed, added or deleted. To edit a group, double click on its icon. To add a user to a group, go to the user menu, select the appropriate user and select the appropriate group. It recommended to create your groups before you start to create your users.

All user settings can be made here. To add an ID, you can type your ID manually, or you can scan the ID with your iButton or RFID reader.

Select the Admin checkbox to grant admin rights to the user. A user with admin rights, can login in this software (with its badge) to change the settings.

Below the admin checkbox, 4 domotics rights can be granted for iCall Sip Touch units. The name for these domotics can be set in the setup section.
