

TxGo

Mobile Security System

TxGo – Mobile Safety System

Mobile. Safe. Connected.

TxGo transforms personal safety into a seamless lifestyle experience. The elegant wrist-worn emergency button delivers dependable protection at all times at home through direct connection to the TA74 carephone, and on the move via the TxGo app, which instantly shares the user’s location with the monitoring center.

Key features

- **Mobile Emergency Coverage**

TxGo enables alarm triggering both indoors and outdoors, ensuring continuous protection beyond the range of the home system and supporting independent mobility.

- **Dual-Mode Connectivity**

Within the home, TxGo connects directly to the TA74 Carephone. Outside, the TxGo smartphone app takes over, transmitting alarms and location data to the monitoring center.

- **Efficient Wireless Technology**

Bluetooth® Low Energy (BLE) and Bluetooth 5.0 ensure stable communication with minimal power consumption, supporting reliable data transmission and long device uptime.

- **Robust Hardware Design**

The device features IP67-rated protection against water and dust and is powered by a replaceable CR2430 lithium battery with a typical lifetime of over two years.

- **System Compatibility and Monitoring**

TxGo is compatible with the TeleAlarm TA74 Carephone series and Android and iOS devices, performing automatic connection and battery checks every 42 hours for consistent system integrity.

Please note: Using TxGo and its application requires the user to already have a TA74 device.

Interested in finding out if TxGo is the right solution for your needs? Get in touch with TeleAlarm for expert consultation and a live demonstration.
